

# HOW FORTRESS IS RESPONDING TO THE CORONAVIRUS OUTBREAK

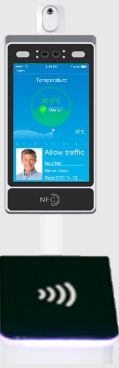

COVID19 has impacted the world in unprecedented ways. Here at Fortress we have been doing our part to keep our employees in the UK, US and Israel safe, while also supporting and reinventing new products and solutions to help our clients around the globe adapt to a new normal.

The majority of our staff is currently working remotely – Except for in locations where local governments have advised it is safe to do otherwise. The health and safety our staff and clients will always come first. We know that by working together, we will see brighter days ahead.

As venues plan to reopen for fans, here are some ways we can help:

## CONTACTLESS TICKETING

As ticketing goes 100% mobile you will need the latest in contactless scanning technology. The TR-180 Pedestal delivers the fastest read times and best operational performance. Your fans deserve the best experience when your doors re-open for the first time.

## THERMAL SCANNING

Our Thermal Scanning solution has been in operation protecting the 62,000 people at the "MLS is Back Tournament" in Orlando. It is match proven and ready to deploy. Stand alone or integrated into ticket scanning.

## CONTACTLESS TICKETING

Add a digital health questionnaire to each ticket or credential issued. Protects your fans and your staff. Our add-on digital solution works with all major ticketing providers.

## CASHLESS PAYMENTS

Go Cashless - deploy loaded tickets or a fully featured mobile wallet. The Fortress advanced payment platform is integrated with all the main concession and retail systems. Plus, deliver realtime promotions, discounts and sponsor incentives. Go fully contactless with NFC/VAS for Apple & Google Wallet
